About Project: Each group must submit project materials online. Please read carefully the following instructions.

- ==Every member== from each group must submit a report about the project. The report must ==describe the project== from every member's own perspective and mostly focus on ==his/her contribution to the project==. Take this report writing very seriously as your evaluation would carry most of the marks from here. There is no page limit and feel free to use figures, screenshots etc. to represent your contribution. Do not forget to put the project title, your name, and ID, and the IDs all the other members at the top of your report.
- ==All the codes (SQL or PLSQL scripts) must be submitted== in a folder. This should be submitted ==as a group==, NOT as individual members.
- A Google form/ drive link will be shared with you very soon where you need to upload the project materials. One member from each group may do the submission. By that time, please start preparing and organizing the materials.
